

Product Information

TM3 Rackmounting

The **TM3 series** devices enjoy great popularity and are used in many applications. The demand for capabilities to mount them into 19" environments grew up.

Therefore, RTW now offers different options to make rack-mounting easy. When ordering the **TM3-2U** option together with a TM3, TM3S, TM3-3G, or TM3-3GS, the delivery package includes a display with mounting frame instead of the table-top display. The rackmount display and the interface box, power

supply, and the delivered USB extension cable can be mounted into the 19"/2U rack carrier/mounting frame **TM3-MA2U**, which is available as a further option featuring the space for up to two complete instruments.

Furthermore, TM3-Pri-2U is the panel-mount version of TM3-Primus for mounting TM3-Primus into an appropriate mechanical environment.

Product Information

TM3 Rackmounting

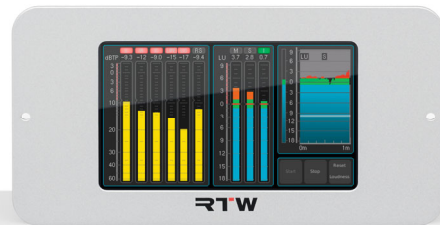

TM3-2U Option

This option allows mounting TM3 series units into rack frame TM3-MA2U or into other appropriate mechanical environments. It can only be ordered together with a TM3, TM3S,

TM3-3G, or TM3-3GS device. Then, a display with mounting frame, mounting material, and an USB extension cable is part of TM3 delivery instead of the table-top TM3 display unit.

TM3-MA2U Option

This option is a 19"/2U rack carrier/mounting frame to be fitted with up to two TM3 series units which must feature the

TM3-2U option. Pictured are examples for mounting the devices into TM3-MA2U.
