

GENERAL DESCRIPTION

Peakmeter

The level meter 1205D is a table-top unit with a swivelling display part. It is featured by a two-channel high resolution LED-Display.

Peakhold display

Peak values can be displayed as a two segment spot. Release can be either manual or automatically.

Loudness display

Additional to the peak level values the loudness values can be shown on the same display. Analogous to the physiological process which takes place in the human ear the both dominant signal parameters "frequency" and "impulse" are weighted and displayed.

Stereo Correlation display

The three-colour display gives a clear indication of the phase relationship of stereo signals.

Peakmeter

Scale length: 111 mm
Display segments: 106 LED segments/channel
Scale range: -60 dB to 0 dB
Headroom: adjustable -5 dB FS to -20 dB FS
Colour of display: up to headroom yellow, headroom red
Integration time: sample or 10 ms
Fall back time: 1.5 s for 20 dB

Correlation display

Display: LED-Display
Scale segments: -1r to + 1r
Scale length: 27 mm
Display: 26-segment LED-display
Colour of display: red -1r to -0,2r
yellow 0r
green +0,2r to +1r

Loudness display

Display: Spot with four green segments
Frequency weighting: 3 filter stages per channel
Detector: True-RMS

In- and Outputs
Signal input: AES/EBU digital format, transformer balanced 110 Ω
Signal outputs: looped digital input signal
